

Copyright in the Age of the Cloud

A lesson for Profitbricks

Adam Mathews

You are going to watch a video called **ACTA Explained**

- What do you know about ACTA?
- What do you expect the video will say?

Access the video here <https://www.youtube.com/watch?v=glR5Kf6GvpY>

Watch the film and answer the questions

- What is Rebecca's problem?
- What does the video say is the *point* of ACTA?
- What is special about the German case?
 - Why hasn't Germany signed-up?
- What three arguments are used against the law?

Proposal:

Copyright is outdated in the age of cloud computing

Argument:

- You'll be given a role in favour or against
- Consider reasons to back-up your point
- Use examples where possible
- Think of possible counter-arguments to the other side

Debate:

Copyright is outdated in the age of cloud computing

Rules:

- All statements and objections go through the chair
- Both sides have five minutes to set out their case (Proposer goes first), then an extra five minutes each for counter-arguments and summing up
- The winning team will be decided by the chair or jury
