

# Artificial Intelligence

## A lesson for Profitbricks

**Adam Mathews**

To access presentations of this and other lessons, including links to videos etc. go to <http://aimlesswanderer.org/teaching.html>

# Alan Turing

What do you know about this man?

Search the web for information about Turing and the following:

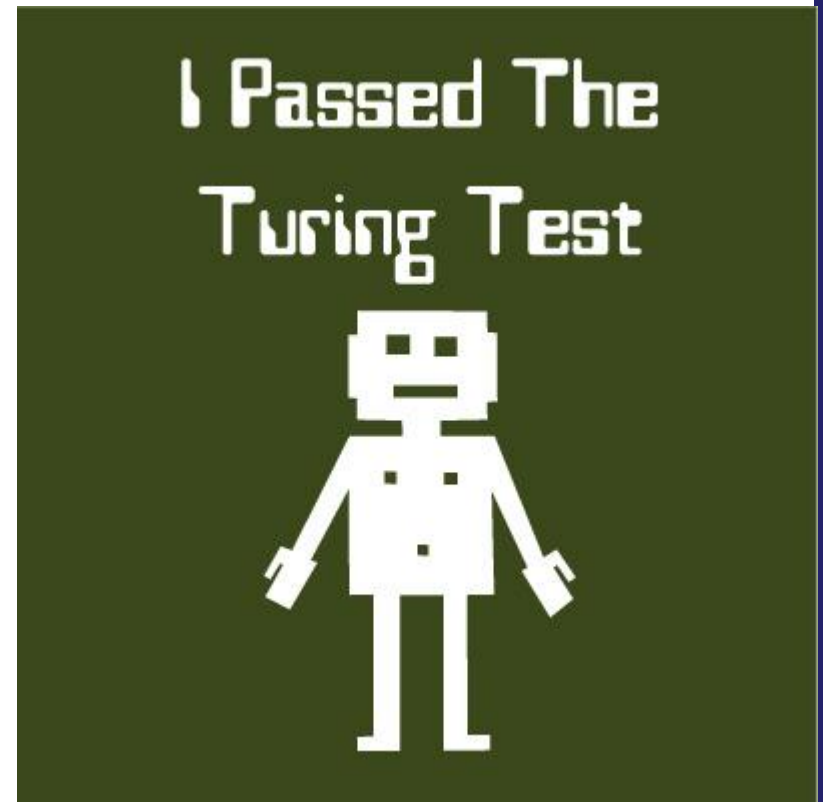

- Role in early computing
- Gross Indecency
- The Enigma Code
- Poisoned apple
- Steve Jobs
- Turing Test

# Turing Test

Get the video here: <https://www.youtube.com/watch?v=1uDa7jklztw>

Watch the video and answer the following questions:

- What was the Turing test?
- What kind of questions did he imagine?
- What did Turing predict?
- What does the computer ask Jeremy?  
Why is this a strange question?
- How does he know she's never heard of the Doobie Brothers?
- In what way does Jeremy think she's intelligent?

# Turing Test

In pairs, think of five questions you could ask to decide whether you were talking to a robot/computer or a real person. The only rule is you are not allowed to ask whether the 'person' is a robot/computer.

Take a couple of minutes to think about what the answers might be.

Now go to either

<http://alice.pandorabots.com>

Or

<http://www.cooldictionary.com/splotchy.mpl>

And ask the questions, then continue your conversation. How well does the computer answer?
